History:          📨 This message has been replied to.

Dear Sir/ Madam:

I had actually sent respective policy suggestions severally to the various bureaus & departments of HK Govt. before, while disappointedly I faced NO response afterward! ,,,,,, Anyway, for the great trouble severe shortage of columbarium's supply domestically, 4 respective policy to alleviate it I do propose:

1)      On venue for constructing NEW columbaria building, I do recommend that be the 1st choice <u>at inner site of Industrial zone</u>, where the columbaria can be surrounded, & "sheltered" from the industrial buildings beside, to reduce any unnecessary nuisance to residential people nearby! ------ Comparatively, the venue at rural residential area ought to be LESS ideal, as it still exists so many residents who will have to long-term face these nuisances!

2)      I absolutely deem, <u>impossible for unlimited increase</u> for the quantity of public columbarium! So, I definitely agree introduction of institution of "RECYCLING of public columbarium-niche space" on at least, such as 20 years! Under this statuary restriction, it can be anticipated the domestic amount of urn-shrine columbarium will be under the controllable maintenance.

3)      It ought to encourage implementation of the policy of <u>FREE pour of cremated-ash to sea</u> for such "voluntary" abstain for request of long-term space-occupation for ancestor's urn-shrine niche afterward!

4)      Similar to item 3, the Govt. ought to proactively propose institution of "<u>Cyber-niche" which, FREE website can be offered individually</u> for memorization of those dead persons.

I should be obliged if you would accept the policy suggestions!
