Subject: 有關骨灰龕政策檢討公眾諮詢文件

The followings are my opinion on the above subject:

(1) 就違規骨灰龕場執法問題：

The government has to stand firm and apply rules and regulations, so that illegal businessman will have no opportunity to seize profit by destroying the environment of “Deer Lake”. The worst situation is that they are interrupting the residents of “Deer Lake” days and nights by using all kinds of illegal act, no difference from the gangsters.

If the government has decided to issue license to businessman or organization to run this kind of “ash try” business, this decision MUST obtain the opinion and point of view from the residents of that area.

(2) 就骨灰龕位供應方面：

The government should supply 100% of “Ash tomb” or at least the government should set up guidelines for all organizations to follow. Now that citizen has to spend a great amount of money to accommodate after dead.

(3) 就鼓勵宗教團體提供骨灰龕的問題：

Rules and regulations should set up clearly for all religion organizations to run this kind of business, this is to avoid any illegal businessman trying to make use of religion organization to make profit. That further brings in other illegal organizations to participant this kind of illegal business practice; thinking is a good chance to make profit through religion organizations.

Other views:

During this “過渡期”, I strongly oppose the setting up of “表二”. If all illegal “Ash Tomb” business is grouped under this “表二”. , the government is actually building a path for these illegal businessman to practice their illegal business. The government has repeatedly advising citizen in the news not to select carefully when making a choice of “Ash tomb” for their ancestors. With this “表二”, the government is promoting confusion to citizens.

In a longer term, the government should promote the practice of “Burying in the ocean” for the dead, with the population in HK going fast and very limited land and space for the living and the dead, this practice should highly be considered.

The other practice should be considered is that “Ash Tomb” should set a “lease time” (e.g. 30 years) and after that “Burying in the oceans” should be applied at that time.
