Dear Sirs,

Public Consultation on Columbarium Policy

We would like to outline, inter alia, our views in regard to the captioned consultation as follows:

- (1) Succinct regulations and regulators;
- (2) Simplified planning and lands submission procedures for columbarium proposals;
- (3) More open-mindedness of government officials in addressing the visual impact and appearance of columbarium buildings or complexes;
- (4) More protection for the consumers during the transitional period before legislation is in place;
- (5) Encourage private/public ventures in columbarium development projects;
- (6) Discourage those "illegal" private practitioners who are operating premises that are not allowed under the current legislative and institutional framework.

We are prepared to elaborate on the above points when the issues are to be publicly and openly discussed.

For and on behalf of

Neodimensions Group Limited

Cheung Neoton
