

To: The Government of HKSAR

I am writing in regards to have a say on the Review of Liquor Licensing.

While I fully support about the extension of the Liquor Licensing, I think that the government should encourage a reserve licensee could take over the original licensee if he or she is incapable to fulfill his or her obligation in a sudden. There would be a deep concern to me that my original licensee might resign at a sudden and I would need to stop my business until I obtain another Liquor License.

Also, the discount factor is like a joke to me. This "measurement" is so unscientific since there would not be an objective way to see the effects of alcohol to people. The effect of alcohol varies person to person. By the way, there is not such a measurement worldwide. This is, to me, another harsh restriction as well as an unfair treatment to the industry.

Please be caring to our concerns.

Regards
