Subject: Today's meeting

---

Dear Dr. chan

Sorry I had to leave early due to another prefixed appointment.

I think for babies, ( 幼兒、 ) I tend to agree in using stricter regulations. Also breast feeding should really be encouraged. Therefore I will go for 不予准許 for 嬰兒配方產品的健康聲稱。 babies should be well protected since they cannot express their own discomforts.

For 較大嬰兒及幼兒配方產 I also go for 不予准許 and I think the World Health's declaration should be a good guide line. But for 健康聲稱的其他功能聲稱, I think can be allowed especially if the 食物及藥物2014 already is regulating. The same reason applies to 嬰幼兒食物的健康聲稱。

I hope these comments are ok

Thank you for inviting me to the meeting today.
