**Part 2**

**Consultation Questions**

**Question 1** How important is choice to you in respect of the supply of electricity? What objectives do you consider should be achieved through introducing competition to the electricity market?

**Question 2** To what extent do you think the current contractual arrangement by SCAs has allowed us to achieve the energy policy objectives of safety, reliability, affordability and environmental protection, and what problems do you see with this regulatory approach?

**Question 3** What is your view on the following areas in the future contractual arrangement (if any) between the Government and the power companies?

(a) duration

(b) permitted rate of return

(c) tariff approval mechanism

(d) fuel cost arrangement

(e) incentive and penalty scheme relating to the performance of the power companies

What other improvements would you suggest?

**Question 4** Should Hong Kong further promote renewable energy despite the higher tariff implications; and if so, about how much (in terms of percentage of your electricity bill) are you prepared to pay?

**Question 5** What specific requirements would you suggest to be set out in the future contractual arrangement (if any) between the Government and the power companies to encourage the promotion of demand side management and renewable energy by the power companies?

**Question 6** Do you have any other comments and suggestions?
